Interventional  
Cardiologist

Nishtha Sodhi, MD  
Interventional  
Cardiologist

Gabriel Olivares, MD  
Heart Surgeon

Robert Steffen, MD  
Heart Surgeon

Natarah Broich, PA  
Physician Assistant

Bryan Laufenberg, PA  
Physician Assistant

Natasha Lee, PA  
Physician Assistant

Sarah Potts, NP  
Nurse Practitioner

Caitlin Rau, PA  
Physician Assistant

Margaret Mary  
Underwood, PA  
Physician Assistant

Carrie Hiemstra,  
BSN, RN  
TAVR Coordinator

Jessica Timmerman,  
BAN, RN  
TAVR Coordinator

Danielle Mitchell  
Scheduling Coordinator

### T.A.V.R.

A procedure that uses a catheter device to place a new aortic valve in your heart.

The TAVR procedure is performed collaboratively with an **Interventional Cardiologist** and a **Heart Surgeon**.

The **Advanced Practitioner (APP)** will be assisting in your care during the hospital stay. Typically, you will meet with our APP within a week after your hospital discharge for a follow up visit.

The **TAVR Coordinators** will help coordinate all of the testing and work-up required for the replacement of your new heart valve. They will be updating you and your family regularly on the plan of care and will also be a consistent resource for answering your questions.

**Allina MHI Structural Heart & Valve Program at United Hospital**

**Phone - 651-241-2730**
